Install MQTT Broker and Clients

Install the Mosquitto[1] MQTT broker and command-line clients.
On Ubuntu the command is:

```
$ sudo apt-get install mosquitto mosquitto-clients
```

Check Installation

Start a subscriber in one console:

```
$ mosquitto_sub -t mytopic
```

Then, in another console run:

```
$ mosquitto_pub -t mytopic -m "hello, world"
```

In the first console you should now see the message get through:

```
$ mosquitto_sub -t mytopic
hello, world
```

---
